## About Engineers Australia

Engineers Australia is the national forum for the advancement of engineering and the professional development of its members. With over 100,000 members embracing all disciplines of the engineering team, Engineers Australia is the largest and most diverse professional body for engineers in Australia.

Engineers Australia's professional competency frameworks have been honed over several decades to keep pace with advances in higher education, industry training reforms and a global push by employers to focus on applied experience, standards of performance and employability rather than simply academic qualifications.

## About Engineering Education Australia

Engineering Education Australia (EEA) is a fully owned subsidiary of Engineers Australia (EA). We work with leading experts in engineering, education, and business to provide learning opportunities to enable engineers to maintain and further develop their professional standards as well as providing opportunities to gain and maintain a competitive edge.

EEA know engineers are delivering projects that benefit all of society and we build their skills to do that. We have been training engineers for over 30 years, tailoring our courses to meet the needs of engineers for jobs of today and preparing engineers for the jobs of the future.

EEA courses are industry recognised supporting the need for engineers to always be upskilling and reskilling in both technical and non-technical areas of practice.

## Micro-credentials

EEA also provides micro-credentials which are short learning and/or experience recognition opportunities in a range of technical and non-technical capability areas. EEA will continue to release new micro-credentials to support industry to bridge the growing skill gap.

**“Micro-credentials are a formal validation that the skills, knowledge and personal attributes acquired through learning and experience have been successfully obtained to an agreed standard of practice.”**

*—Professor Marcus Bowles, Macquarie University, Centre for Workforce Futures 2016*

Engineers can upskill and reskill when they want, how they want, in the area of expertise they need, anytime and anywhere.

EA awards micro-credentials to recognise the achievement by the engineer of experience and EA's micro-credentials provide evidence of an engineer's professional capability and competency in communication.

EA develops micro-credentials in consultation with industry. We work with industry to identify skill needs, skill shortages and future trends to enable engineers to be future-ready today and tomorrow. All Engineers Australia's micro-credentials align to one or more, frameworks including

Stage two chartered competencies, Specialist knowledge in an area of practice or Engineers Australia's Capability Framework.

Whilst aligning to a specific framework, micro-credentials criteria is used to develop explicit content for learning and assessment creation. The criteria shape the assessment requirements. The criteria provide direction regarding the type of evidence required for the portfolio of work and the questions covered during the interview.

## Your guide

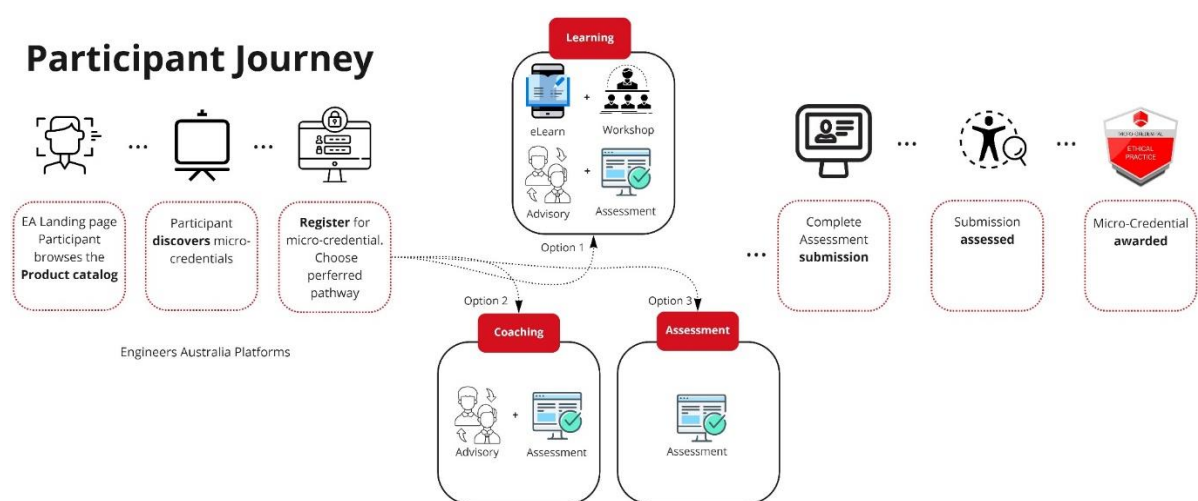

This guide provides you with a step-by-step summary of the journey to a micro-credential via the learning pathway. Your journey commences with determining what micro-credential is best suited for you at this point in your career. Are you looking for future focus capabilities, for completing a micro-credential that provides you with skills you need now? Explore your options at [eea.org.au/micro-credentials-engineers](http://eea.org.au/micro-credentials-engineers).

The image below shows the learning pathway as option one

- Elearn – pre-workshop activities
- Online Workshop
- Advisory Session
- Assessment

## Micro-credential journey

Before we get to what you need to do, let us look at the participant journey.

## What do I do?

---

You can choose from several capabilities targeted to assist engineers at various points in their career journey. For example, 'Stakeholder Engagement' and 'Ethical Practice' micro-credentials are for those engineers who may wish to commence the journey towards chartered, or as a stand-alone credential addressing specific needs. The criteria for both these credentials align with the requirements of a Chartered application; however, they are only a component of the requirements under the holistic assessment format.

You may wish to use the micro-credentials to showcase your acquired skills, knowledge, or capabilities gained in the workplace and apply for an assessment of their experience. The assessment aligns with the endorsed criteria to ensure consistency and rigour of assessment outcomes.

## Deciding which credential

---

You will have a choice. You can choose a capability area to develop, how you consume learning, and whether you want to be recognised for skills already achieved. You, as the engineer will drive your individual development.

## Registering for a credential

---

If a micro-credential sounds like it's for you, visit us at either micro-credentials for engineers or go directly to our communication micro-credential to register and take that step.

## Learning pathway

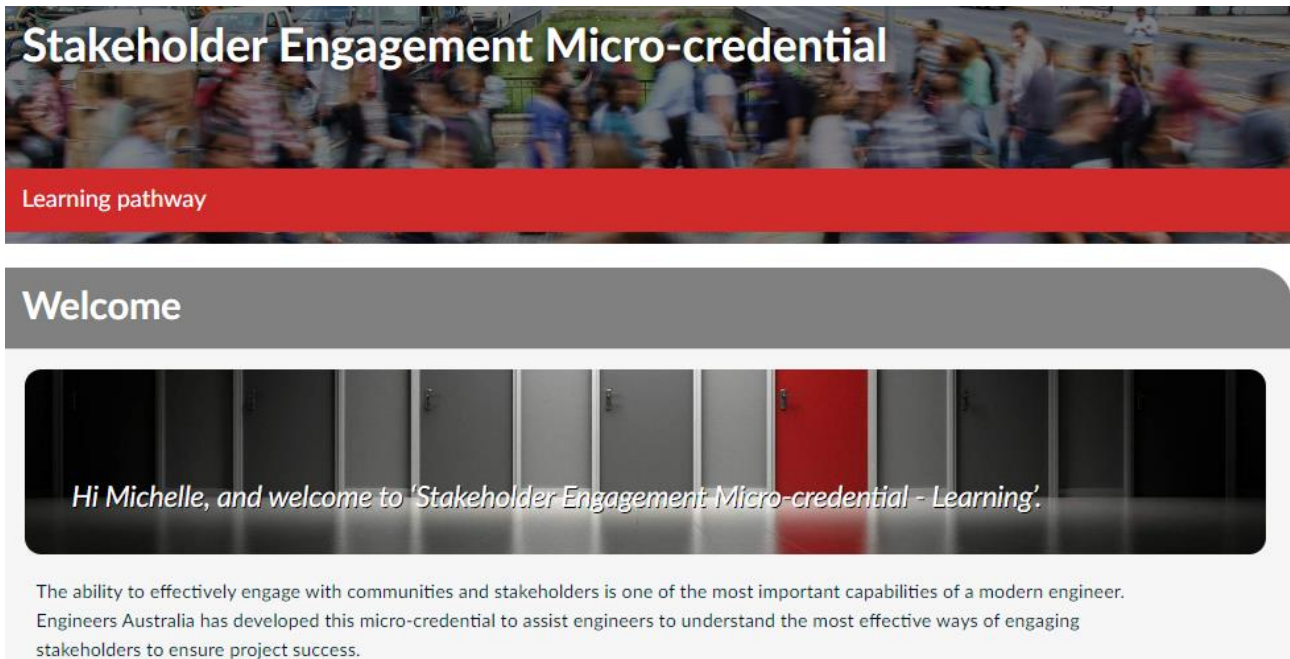

The learning pathway takes you on a learning experience which includes

- Online pre-workshop activities
- Virtual workshop
- Advisory Session
- Assessment submission

## Pre-workshop activities

You will receive a course invitation from instructor which is our Learning Management System EngLearn. Click on 'accept course invitation', this will take you to EngLearn login page, your account has automatically been setup, however you will need to reset your password by using 'forget password' and follow the instructions received via email to activate your account.

Your online workshop login details will take you to our learning management system EngLearn, the first section of this elearn will explain how to navigate EngLearn, then take you into the pre-workshop activities. Your welcome page should look like this:

**Stakeholder Engagement Micro-credential**

Learning pathway

Welcome

*Hi Michelle, and welcome to 'Stakeholder Engagement Micro-credential - Learning'.*

The ability to effectively engage with communities and stakeholders is one of the most important capabilities of a modern engineer. Engineers Australia has developed this micro-credential to assist engineers to understand the most effective ways of engaging stakeholders to ensure project success.

Once you have accessed EngLearn you will be able to work through the pre-workshop activities at your own pace ensuring, of course, that you have worked through each of the activities prior to attending the workshop.

You will receive your workshop information via EngLearn please ensure you diarise this information and make your preparations.

#### MICRO-CREDENTIAL UPCOMING WORKSHOP

You are registered for the upcoming Micro-credential Learning Pathway workshop.

This workshop will be conducted online, Monday 22nd August @ 9:30am (AEST).

##### **Workshop Details:**

Please ensure you read these instructions and have registered via the link below. It is **important that you register** before the workshop.

##### **Registration Link** [↗](#)

After registering, you will receive a confirmation email from [no-reply@zoom.us](mailto:no-reply@zoom.us) containing information about joining the workshop, including a placeholder for your calendar.

##### **To participate in virtual workshops:**

- Switch on your camera and keep it on (you can mute and unmute as required).
- Pen and notepaper on hand.
- Use a headset, or locate yourself in a quiet room and use your computer's internal mic.

##### **We would appreciate if you could be virtual workshop ready by:**

- Turning off all distractions like mobile phones, meeting and email notifications etc.
- Have a pen and paper ready.
- Have your cup of coffee/tea/water ready.
- Log in 15 minutes prior to the commencement of the virtual workshop. This way we can ensure that any technical issues are addressed before the workshop.

If you have any further questions, please do not hesitate to contact us via email [microcredentials@eea.org.au](mailto:microcredentials@eea.org.au)

## Workshop preparation

To participate in EEA Virtual Workshops, you will need:

- Switch on your camera and keep it on (you can mute and unmute as required)
- Pen and notepaper
- Headset or locate yourself in a quiet room and use your computer's internal mic

We would appreciate if you could be Virtual Workshop ready by:

- Turning off all distractions like mobile phones, Skype/Team Meeting notifications, emails etc.
- Have a pen and paper ready
- Have your cup of coffee/tea/water ready
- Log in 15 minutes prior to the commencement of the virtual workshop. (This way we can ensure that any technical issues are addressed before the workshop.)
- Participate, ask lots of questions in the Virtual Session and have fun!

## Advisory session

Once you have attended the workshop, go back to EngLearn, this is where you book your advisory session. Follow the steps under the instructions and confirm your booking.

### Advisory session

#### Instructions

The advisory pathway includes a 20-30 minute session with an education specialist who will provide clarification on submission requirements and discuss the submission process. This is a great opportunity to discuss the requirements of your submission, sense check your examples, work through appropriate evidence. You can ask specific questions about the video submission.

*To book your coaching session for this course please follow the procedure below:*

Step 1
Step 2
Step 3
Step 4
Step 5

## Assessment Submission

You submit your body of evidence, including a reflective explanation on why the evidence examples fulfil the micro-credential criteria, along with your micro-credential checklist, including evidence key. **Please note:** all submissions must be in English.

**Step 1:** You must describe at least two different work examples relating to the micro-credential topic. Prior to choosing the work examples, it is highly recommended that you familiarise yourself with the criteria listed below:

1. Identify and map stakeholders.
2. Build positive relationships and mechanisms for cooperation and influence within the organisation and external stakeholders.
3. Describe the range of stakeholder interests and impacts considering safety, environment, public health, and public concerns.
4. Engage and negotiate with a diverse range of stakeholders to arrive at an agreed position relating to an engineering solution, problem, instruction, or recommendation.

5. Use your engineering expertise and influencing strategies to obtain high-level support for an initiative from a diverse range of stakeholders.

*If participants have any queries or would like to seek clarification, submit an email to [microcredentials@eea.org.au](mailto:microcredentials@eea.org.au) and include, the Micro-credential and which criteria and clarification is being sort.*

Once you have familiarised yourself with the criteria and chosen your work examples, you are required to collate the body of evidence. You are required to have at least one piece of evidence align to each criterion. One piece of evidence may address more

than one criterion. It is suggested that you ideally seek to provide holistic examples which address a range of criteria when compiling evidence for your submission.

**Step 2:** Collate your workplace evidence and align to each criteria, break down each criteria into smaller sections to ensure you are addressing all requirements. For example, the communication criteria “Communicate with various stakeholders using relatable, meaningful, and influential means” could be broken into three different sections:

- Communicate;
- Identify stakeholders; and
- Ensure communication is relatable, meaningful and is influencing the intended audience

You may wish to provide evidence which demonstrates multiple criteria with an example such as a project report and explain using the section provided on how it aligns to the criteria identified. Refer to step 3.

**Please note:** Workplace examples and supporting evidence must be within the last 24 months. If examples are older, relevance must be demonstrated within the reflection explanation.

**Document upload please note:** When uploading your evidence, you must upload pdf documents under 500MB in size. If you wish to submit larger documents, either compress files or please provide a link to a free viewing platform so assessors can access your documents.

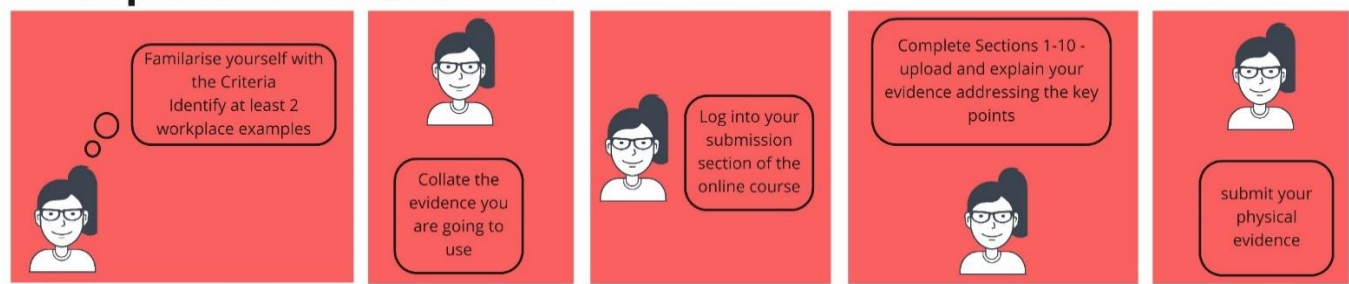

**Step 3:** In this step you must provide a reflection on how and why the evidence relates to the criteria, and address the following questions:

- Identify the criteria you are addressing with the piece of evidence
- Provide context of this example? Describe the context, this may include, environment, stakeholders, contractual arrangements etc.
- What was your contribution to the example provided? Reflection should describe what you contributed to the examples – ie: Author, Reviewer, Contributor, team member etc.
- How does this example demonstrate your capability? Reflection should provide an explanation of how the example aligns to one or more criteria.
- Did you achieve what you expected in the example provided? Reflection on the outcome of the example provided whether the outcome was expected or unexpected – what was the lessons learned.

**Step 4:** Once the workplace portfolio of evidence has been submitted, you will be required to attend a video interview, during this interview you will be required to verbally answer around 6 questions in 30-40 mins.

**Step 5:** Your final step is to check all submission requirements have been met, using the Submission Checklist provided at the end of this guide. The Submission Checklist is to be submitted along with all evidence for assessment.

## Work portfolio submission

## Video submission

## Assessment timelines:

**Submission:** Participant have 8-10 weeks from date of access to the assessment module to submit all evidence for assessment.

**Assessment:** You will be notified of your assessment outcome 10 business days after submission.

**Outcome:** You will either be notified successful or resubmit. If successful a digital badge will be issued as part of the notification.

**Resubmit:** If you are required to resubmit. You will need to address the feedback provided by the assessor and provide further evidence or clarify further in your written reflection. You will have 10 business days to resubmit, and the assessor will have a further 5 business days to assess the additional information provided.

## Award

---

Once an assessment is complete, participants will receive their results, feedback and link to their digital badge. The digital badge can then be shared on social media platforms or included in an electronic CV.

# Micro-Credential Submission Checklist

Participant Name	
Micro-Credential	

*For participant use only*

Criteria	Submission detail and reflection	
Criteria 1 - Identify and map stakeholders.	Evidence submitted	<input type="checkbox"/>
	Explanation (500Word max)	<input type="checkbox"/>
Criteria 2 - Build positive relationships and mechanisms for cooperation and influence within the organisation and external stakeholders.	Evidence submitted	<input type="checkbox"/>
	Explanation (500Word max)	<input type="checkbox"/>
Criteria 3 - Describe the range of stakeholder interests and impacts considering safety, environment, public health, and public concerns..	Evidence submitted	<input type="checkbox"/>
	Explanation (500Word max)	<input type="checkbox"/>
Criteria 4 - Engage and negotiate with a diverse range of stakeholders to arrive at an agreed position relating to an engineering solution, problem, instruction, or recommendation.	Evidence submitted	<input type="checkbox"/>
	Explanation (500Word max)	<input type="checkbox"/>

<p><b>Criteria 5</b> - Use your engineering expertise and influencing strategies to obtain high-level support for an initiative from a diverse range of stakeholders.</p>	Evidence submitted	<input type="checkbox"/>
